

Protect Spring Creek and Willow Creek

Bacteria in Our Water Can Make Us Sick!

Did You Know?

Both Spring Creek and Willow Creek are categorized as impaired waterbodies due to high levels of bacteria (E-coli). That means contact recreation activities such as wading or swimming are deemed unsafe for the public. Through every day actions, we can all help eliminate potential bacteria sources which can reach the creeks by following storm water.

Bacteria Sources

What You Can Do

Trash/Litter

Dispose of trash and litter into trash cans.

Fats, Oils, and Grease (FOG) and Wastewater Overflows from Clogged Sewers

Avoid clogging sewer pipes. DO NOT dump FOG down the drain.

Use a container.

Clean up FOG with paper towels.

Pet Waste

Flush It

Bag It and Trash It

Bury It

Illegal Dumping

Please report it to the City.
