

Stay Clear and Don't *FOG* up the Drain

Put fats, oil, and grease in the trash instead!

Did You Know?

Fats, Oils, and Grease (FOG) can cause blockage in the sewers, leading to sewer overflows. By keeping FOG away from the drain, you are helping to protect water quality and save money spent on sewage spill cleanups and sewer maintenance.

Look Out For

What You Can Do

Small amount of FOG

Absorb with a paper towel.

Large amount of FOG

Dump in a covered/sealed container for recycling or disposal.

Large Amount of Food Scraps/Leftovers

**Scrape into trash cans.
Avoid the garbage disposal.**

Small Amount of Food Scraps/Leftovers

**Use catch baskets or drain screens,
then empty into the trash as needed.**
