

# Keep Storm Water Clean

## Only rain goes down the drain!

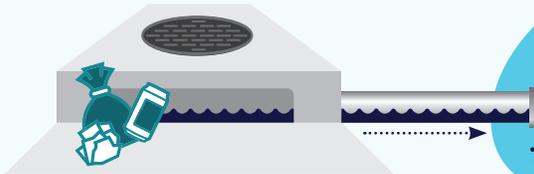

### Did You Know?

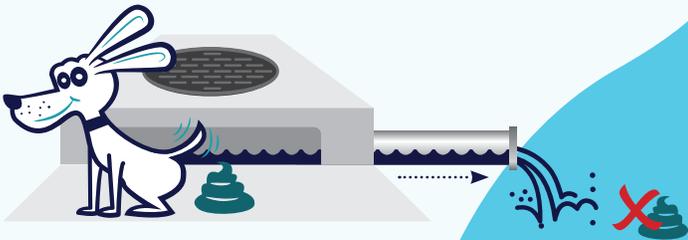

Storm water collected from streets, ditches, storm drain inlets, and pipes flow directly into natural streams and rivers WITHOUT being treated. It is important to keep storm water clean to protect our water sources and aquatic environments.

### What You Can Do

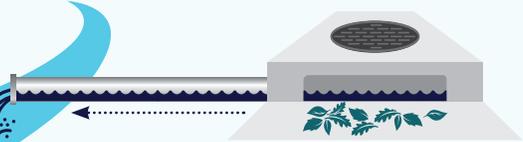

**Throw all trash and garbage in the trash cans.**

**Scoop up pet waste and dispose it into trash cans.**

**Don't blow leaves and grass into streets or streams. Bag them up for disposal.**

**Contact hazardous waste disposal services to dispose of liquids like oils, chemicals, and petroleum.**
